

Housing Partnership Programme

Highfields, Heath

Procurement Strategy

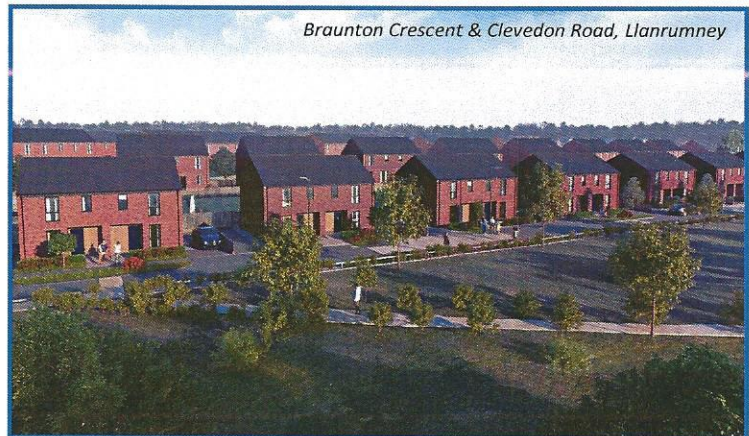

Wates has developed a detailed Procurement Strategy to guarantee successful delivery of this project. We will appoint a *restricted number* of preferred subcontractors with the necessary *skills, knowledge and experience*. This will encourage *fairness, continuity of work* and facilitate *open working relationships* through the design and construction stage.

Community Benefits and Engagement

One of the reasons Wates was awarded this contract is our track record of delivering on our commitments to creating 'economic growth' and creating opportunities for local people. This includes:

- Local labour commitments
- Training & Apprenticeship opportunities
- Supporting communities

We have formed partnerships with agencies and recruitment services which can help you resource this project and save on recruitment costs. This will help to ensure we deliver on our customer set objectives, whilst helping you to ensure you are able to meet our rigorous local labour and CSR targets. *All of our delivery partners will be required to fully engage in these commitments.*
